Lucky Technology Ltd is the developer and manufacturer of embedded systems and Internet appliances. Our flagship product, iGuard Access Control Security System, has gained a worldwide reputation with highly favourable acceptance by the market. Its patented, revolutionary Embedded Web Server technology has brought unprecedented convenience to users by enabling them to access the product anytime anywhere in the world via the Internet. Based on this technology, we produce another product, iBonus, a prepaid smart card and bonus system for retail chains.

iBonus Terminal is a powerful and sophisticated off-the-shelf smart card payment and bonus point solution available today. Comprehensive member card transaction and smart card handling functions such as card issuing blacklisting and card replacements are all included in this device. It enables the card handling process to be done at any branches. Being an off-the-shelf and proven field solution, iBonus System lets you issue smartcards with your own brand in no time. The user can view the balance easily through the Web browser by deploying Web Reporting, which uses SQL Server Reporting Service technology. Microsoft SQL Server can be used for a large deployment with sophisticated reporting or clusters for database.

Maginus

At Maginus we understand the unique challenges of running multi-channel retail businesses. We focus on providing solutions to help you improve customer service, grow revenues whilst at the same time controlling and reducing operational costs.

With the highest fit of any multi-channel solutions provider, Maginus provide a range of software and technology solutions that will meet all your business management needs in a single integrated environment, including MCC (powered by Microsoft Dynamics), eCommerce, Microsoft Dynamics POS 2009 and Managed Services – all are scalable, adaptable and highly functional.

Our solutions give companies comprehensive control over multi-channel sales, fulfilment and service, allowing them to market, sell and deliver products and services to customers via retail outlets, the Web, catalogue and mail order, telesales and kiosks.

To get the best out of your business it is essential to maximise and extend the various channels to your market. Maginus can help you across each of your channels by providing an integrated solution approach, extending your reach and knowledge of your customers and providing a true customer-centric experience each time you engage with them.

Maginus is one of the first UK distributors of Microsoft's new Dynamics POS solution, Microsoft Dynamics POS 2009, and is a Microsoft Gold Certified Partner.

Mannai Corporation is one of Qatar's leading professional firm, providing integrated services in the vertical segments like software, trading, engineering, automobile, airlines and marine operations. The group is a significant player in each of these areas and has been active in introducing the latest technological improvements into Qatar.

Started in 1950 on a modest scale, Mannai has grown over the last four decades into a major commercial enterprise. Increasingly international in outlook, the corporation now has operating companies, subsidiaries, joint ventures and affiliates throughout the Middle East and a number of European countries and the CIS States.

Employing 2,000 people over a broad geographic coverage enables the company to serve hundreds of customers; many of which are universally recognised and admired. Its roster of clients includes the world's largest multinational companies, trading houses and governmental and institutional organisations. The current group turnover is over US\$300 million.
