

US Air Force Deploys iGuard Biometric & Smart Card Security System from Artemis Solutions Group

Artemis Solutions Group (ASG) announced today that the United States Air Force is deploying the iGuard Fingerprint and Smart Card access control security system - www.iguarddirect.com - to protect IT resources.

(PRWEB) September 30, 2005 -- Artemis Solutions Group (ASG) (www.artemis-usa.com) - a global leader in biometric and smart card technology announced today that the United States Air Force is deploying 80 units of Lucky Technologies iGuard LM Series fingerprint and smart card IP security devices (www.iguarddirect.com) to secure Information Technology assets within the US.

Through ASG's authorized government reseller, Patriot Solutions, Inc. of Baltimore Maryland (www.patriotsolutionsinc.com) the USAF is deploying 80 units of the iGuard to protect Information Technology assets on an undisclosed Air Force Base within the Continental USA.

As featured in the last season's blockbuster FOX TV show '24', the iGuard is a self-contained IP Access Control Security appliance that utilizes fingerprint and contactless smart card technology integrated into a seamless security solution that can be accessed, controlled and maintained through a simple connection through any web browser located on the internal network. Downloading of the transaction registry is simple through a .csv or .xls spreadsheet or direct connection to SQL or most databases through an ODBC interface.

Capable of enrolling up to 20,000 users, the iGuard LM Series is the best selling IP based fingerprint and contactless smart card security system in the world and ASG has been an authorized distributor for the iGuard since 2002.

For more information regarding the iGuard product, go to www.iguarddirect.com.

About Artemis Solutions Group:

ASG (www.artemis-usa.com) is a closely held, private security firm specializing in fingerprint biometric and smart card security solutions.
